This license is granted and said appropriator takes all rights herein mentioned subject to the terms and conditions set forth in Section 20 of Chapter 586, Statutes of 1913, as amended, which is as follows:

Sec. 20. All permits and licenses for the appropriation of water shall be under the terms and conditions of this act, and shall be effective for such time as the water actually appropriated under such permits and licenses shall actually be used for the useful and beneficial purposes for which said water was appropriated, but no longer; and every such permit or license shall include the construction of conditions therein which in substance shall include all of the provisions of this section and likewise the statement that any appropriator of water, to whom said permit or license may be issued, shall take the same subject to such conditions as herein expressed; provided, that at any time after the expiration of twenty years after the granting of a license, the state or any city, county, municipal water district, irrigation district, lighting district, or any political subdivision of the state shall have the right to purchase the works and property occupied and used under said license and the works built or constructed for the enjoyment of the rights granted under said license; and in the event that the said state, city, county, municipal water district, irrigation district, lighting district or political subdivision of the state is desiring to purchase and the said owner of said works and property can not agree upon said purchase price, said price shall be determined in such manner as is now or may hereafter be determined in eminent domain proceedings. If it shall appear to the state water commission at any time after a permit or license is issued as in this act provided that the permittee, or licensee, or the heirs, successors, or assigns, of said permittee or licensee, has not put the water granted under said permit or license to the useful or beneficial purpose for which the permit or license was granted, or that the permittee or licensee, or the heirs, successors, or assigns of said permittee or licensee, has ceased to put said water to such useful or beneficial purpose, or that the permittee or licensee, or the heirs, successors, or assigns of said permittee or licensee, has failed to observe any of the terms and conditions in the permit or license as issued, then and in that case the said commission, after due notice to the permittee, licensee, or the heirs, successors or assigns of such permittee or licensee, and a hearing thereon, may revoke said permit or license and declare the water to be unappropriated and open to further appropriation in accordance with the terms of this act. The findings and declaration of said commission shall be deemed to be prima facie correct until modified or set aside by a court of competent jurisdiction; provided, that any action brought so to modify or set aside such finding or declaration must be commenced within thirty days after the service of notice of said revocation on said permittee or licensee, his heirs, successors or assigns. And every licensee or permittee under the provisions of this act if he accepts such permit or license shall accept the same under the conditions precedent that no value whatsoever in excess of the actual amount paid to the state therefor shall at any time be assigned to or claimed for any permit or license granted or issued under the provisions of this act, or for any rights granted or required under the provisions of this act, in respect to the regulation by any competent public authority of the services or the price of the service to be rendered by any permittee or licensee, his heirs, successors or assigns or by the holder of any rights granted or acquired under the provisions of this act, or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the state or any city, county, municipal water district, irrigation district, lighting district or any political subdivision of the state, of the rights and property of any permittee or licensee, or the possessor of any right granted, issued, or acquired under the provisions of this act. The application for a permit by municipalities for the use of water for said municipalities or the inhabitants thereof for domestic purposes shall be considered first in right, irrespective of whether they are first in time; provided, however, that such application for a permit or the granting thereafter of permission to any municipality to appropriate water, shall not authorize the appropriation of any water for other than municipal purposes; and providing, further, that where permission to appropriate is granted by the state water commission to any municipality for any quantity of water in excess of the existing municipal needs therefor, that pending the application of the entire appropriation permitted, the state water commission shall have the power to issue permits for the temporary appropriation of the excess of such permitted appropriation over and above the quantity being applied from time to time by such municipality; and providing, further, that in lieu of the granting of such temporary permits for appropriation, the state water commission may authorize such municipality to become as to such surplus a public utility, subject to the jurisdiction and control of the railroad commission of the State of California for such period or periods from and after the date of the issuance of such permission to appropriate, as may be allowed for the application to municipal uses of the entire appropriation permitted; and providing, further, that when such municipality shall desire to use the additional water granted in its said application it may do so upon making just compensation for the facilities for taking, conveying and storing such additional water rendered valueless for said purpose, so the person, firm or corporation which constructed said facilities for the temporary use of said excess waters, and which compensation, if not agreed upon between the municipality and said person, firm or corporation, may be determined in the manner provided by law for determining the value of property taken by and through eminent domain proceedings.

3. License 4358 was subsequently assigned to the June Lake Public Utility District (District).
4. A Petition for Change has been filed with the State Water Resources Control Board (SWRCB).
5. On December 22, 1995, the California Sportfishing Protection Alliance's protest was resolved based on a bypass condition for Fern Creek, which shall be included in this Order.
6. The petitioned changes would not constitute the initiation of a new right nor operate to the injury of any other lawful user of water.
7. The license condition regarding the SWRCB's continuing authority should be updated to conform to Title 23, CCR Section 780(a).

NOW, THEREFORE, IT IS ORDERED THAT:

1. The license condition regarding the source be amended to read:

(0000004)

5. A new condition be added to the license to read as follows:

The District shall install and maintain a permanent piped bypass around the Fern Creek source sized such that a minimum of 200 gallons per minute will always flow by the diversion regardless of water use by the District, and configured such that it cannot be restricted or plugged.

(0050400)

(0350400)

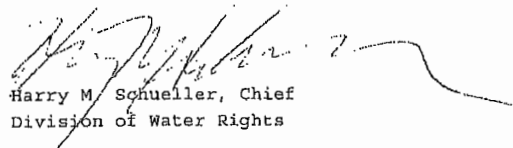

6. The SWRCB'S continuing authority condition be amended to read:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this license including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the SWRCB in accordance with the law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the SWRCB may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce returnflow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust. 4. Fish and Game Code Section 5946 requires that the State Water Resources Control Board condition Licenses that authorize diversion of water in Department of Fish and Game District 4 ½ (Inyo and Mono Counties) to specify compliance with Section 5937 of the Fish and Game Code.
5. The License was issued without referencing compliance with Section 5937.
6. Since amendment of License 4358 to require compliance with Fish and Game Code Section 5937 is a ministerial action, this Order is exempt from the provisions of the California Environmental Quality Act (CEQA) and the State CEQA Guidelines in accordance with Section 21080 of the Public Resources Code.

NOW, THEREFORE, IT IS ORDERED THAT:

The following condition is added to this License:

In accordance with the requirements of Fish and Game Code Section 5946, this License is conditioned upon full compliance with Section 5937 of the Fish and Game Code.

In the Matter of Permit 7350 (Application 11892)

June Lake Public Utility District

ORDER APPROVING CHANGE IN POINT OF DIVERSION AND PLACE OF USE
AND TIME EXTENSION
AND AMENDING THE PERMIT

SOURCE: Unnamed stream and unnamed springs tributary to Reversed Creek

COUNTY: Mono

WHEREAS:

1. Permit 7350 was issued to D.C. Peterson on April 22, 1949, pursuant to Application 11892.
2. Permit 7350 was subsequently assigned to the June Lake Public Utility District (District).
3. A petition to change the point of diversion and place of use and a petition for extension of time were filed with the State Water Resources Control Board (SWRCB) on July 25, 1990, and August 13, 1990, respectively. The SWRCB has determined that good cause for such change and time extension has been shown. Public notice of the petitions was issued on August 10, 1990, April 9, 1991, and February 10, 1992. Protest issues have been resolved.
4. The SWRCB has determined that the petitioned changes do not constitute the initiation of a new right nor operate to the injury of any other lawful user of water.
5. The permit term relating to the continuing authority of the SWRCB should be updated to conform to section 780(a), title 23 of the California Code of Regulations.
6. The permit term relating to the water quality objectives of the SWRCB should be updated to conform to section 780(b), title 23 of the California Code of Regulations.
7. Fish, wildlife, and plant species have been or may be listed under the federal Endangered Species Act and/or the California Endangered Species Act. A term should be placed in the permit making the permittee aware of possible obligations resulting from these acts.
8. On December 22, 1995, the California Sportfishing Protection Alliance's protest was resolved based on a bypass condition for Fern Creek, which shall be included in this Order.

ARM 12-8-00

VAW 12/14/00

9. On August 20, 1998, the District filed a Notice of Exemption with the Mono County Clerk finding that the project is categorically exempt under Class 4, Title 14, section 15304 of the California Environmental Quality Act.

NOW, THEREFORE, IT IS ORDERED THAT PERMIT 7350 IS AMENDED TO READ AS FOLLOWS:

1. The permit condition regarding the source be amended to read:

3. The permit condition regarding the place of use be amended to read:

The "Down Canyon Water Service Area" is described as follows:

4. A new condition be added to the permit to read as follows:

The June Lake Public Utilities District (District) shall maintain a permanent piped bypass around the Fern Creek source sized such that a minimum of 200 gallons per minute will always flow by the diversion regardless of water use by the District, and configured such that it cannot be restricted or plugged. (0050400)

(0350400)

5. The time to complete full beneficial use is extended to December 1, 2005. (0000009)

6. The continuing authority condition shall be amended to read:

Pursuant to California Water Code sections 100 and 275 and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the SWRCB in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the SWRCB may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirement for the authorized project. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the SWRCB also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust

uses. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution article X, section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.

(0000012)

7. The water quality objectives condition shall be added to the permit:

The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the SWRCB if, after notice to the permittee and an opportunity for hearing, the SWRCB finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the SWRCB finds that: (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

(0000013)

8. Permit 7350 is amended to include the following Endangered Species condition:

This permit does not authorize any act which results in the taking of a threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish and Game Code sections 2050 to 2097) or the federal Endangered Species Act (16 U.S.C.A. sections 1531 to 1544). If a "take" will result from any act authorized under this water right, the permittee shall obtain authorization for an incidental take prior to construction or operation of the project. Permittee shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this permit.

PLEASE ANSWER ONLY THOSE QUESTIONS BELOW WHICH ARE APPLICABLE TO YOUR WATER RIGHT PROJECT.

(Please note that future amendments to the claims below will not be accepted.)

An appropriate water right can be reduced or revoked through five continuous years of nonuse. However, the California Water Code specifies that under certain conditions no reduction or loss of the appropriate water right shall occur due to: (a) water conservation efforts; (b) use of recycled, desalinated, or polluted water; and/or (c) conjunctive use of groundwater and surface water. You must report the extent and amount of water claimed for credit below. Failure to report the amounts will deprive you of the benefits allowed under the Water Code sections.

CONSERVATION OF WATER: (Water Code section 1011)

10. ☒ YES ☐ NO During the period covered by this Report, were you implementing any water conservation efforts? If YES, please describe:
EVEN THOUGH WATER SUPPLY SUFFICIENT IN 2004, CUSTOMERS NOTIFIED TO CONTINUE TO CONSERVE WATER. DISTRICT STARTED A METER PROGRAM IN 2002 WITH COMPLETION BY 2007.

11. If YES and you want to claim credit for the amount of water conserved towards the water use authorized under your permit as allowed under Water Code section 1011, please show the amount of water conserved below:

_____ (specify the amount in acre-feet or million gallons) Future amendments to this claim will not be accepted.

WATER QUALITY AND WASTEWATER RECLAMATION: (Water Code section 1010)

12. ☐ YES ☒ NO During the period covered by this Report, did you use reclaimed water from a wastewater treatment facility, water from a desalination facility, or water polluted by waste to a degree which unreasonably affects the water for other beneficial uses?

STATE OF CALIFORNIA
STATE WATER RESOURCES CONTROL BOARD
DIVISION OF WATER RIGHTS

In the Matter of Permit 7352 (Application 12060)

June Lake Public Utility District

ORDER APPROVING CHANGE IN POINT OF DIVERSION AND PLACE OF USE
AND TIME EXTENSION
AND AMENDING THE PERMIT

SOURCE: Unnamed stream, unnamed springs and Fern Creek, all tributary to
Reversed Creek

COUNTY: Mono

WHEREAS:

1. Permit 7352 was issued to D.C. Peterson on April 22, 1949, pursuant to Application 12060.
2. Permit 7352 was subsequently assigned to the June Lake Public Utility District (District).
3. A petition to change the point of diversion and place of use and a petition for extension of time were filed with the State Water Resources Control Board (SWRCB) on July 25, 1990 and August 13, 1990, respectively. The SWRCB has determined that good cause for such change and time extension has been shown. Public notice of the petitions was issued on August 10, 1990, April 9, 1991, and February 10, 1992. Protest issues have been resolved.
4. The SWRCB has determined that the petitioned changes do not constitute the initiation of a new right nor operate to the injury of any other lawful user of water.
5. The permit term relating to the continuing authority of the SWRCB should be updated to conform to section 780(a), title 23 of the California Code of Regulations.
6. The permit term relating to the water quality objectives of the SWRCB should be updated to conform to section 780(b), title 23 of the California Code of Regulations.
7. Fish, wildlife, and plant species have been or may be listed under the federal Endangered Species Act and/or the California Endangered Species Act. A term should be placed in the permit making the permittee aware of possible obligations resulting from these acts.

8. On December 22, 1995, the California Sportfishing Protection Alliance's protest was resolved based on a bypass condition for Fern Creek, which shall be included in this Order.
9. On August 20, 1998, the District filed a Notice of Exemption with the Mono County Clerk finding that the project is categorically exempt under Class 4, Title 14, section 15304 of the California Environmental Quality Act.

NOW, THEREFORE, IT IS ORDERED THAT PERMIT 7352 IS AMENDED TO READ AS FOLLOWS:

1. The permit condition regarding the source be amended to read:
 - 1) Unnamed stream; 2), 3) two unnamed springs tributary to Reversed Creek thence Mono Lake; and 4) Fern Creek tributary to Reversed Creek thence Rush Creek thence Mono Lake in Mono County. (0000001)
2. The permit condition regarding the points of diversion is amended to read:
 - 1) South 1,400 feet and East 700 feet from NW corner of Section 22, T2S, R26E, MDB&M, being within SW $\frac{1}{4}$ of NW $\frac{1}{4}$ of said section.
 - 2) South 700 feet and East 75 feet from NW corner of Section 22, being within NW $\frac{1}{4}$ of NW $\frac{1}{4}$ of said section. Also described as California Coordinate System, Zone 3, North 463,200, East 2,405,000.
 - 3) South 3,500 feet and West 2,400 feet from NE corner of Section 21, T2S, R26E, MDB&M, being within NW $\frac{1}{4}$ of SE $\frac{1}{4}$ of said section. Also described as California Coordinate System, Zone 3, North 460,800, East 2,402,300.
 - 4) South 2,500 feet and East 900 feet from NW corner of Section 22, T2S, R26E, MDB&M, being within the SW $\frac{1}{4}$ of NW $\frac{1}{4}$ of said Section. Also described as California Coordinate System, Zone 3, North 461,800, East 2,405,600. (0000002)
3. The permit condition regarding the place of use be amended to read:

The "Down Canyon Water Service Area" is described as follows:

Within the SE $\frac{1}{4}$ of SE $\frac{1}{4}$ of Section 8; within the SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of Section 9; within the SE $\frac{1}{4}$ of Section 15; within the S $\frac{1}{2}$ of SW $\frac{1}{4}$, the S $\frac{1}{2}$ of SE $\frac{1}{4}$, and the W $\frac{1}{2}$ of NW $\frac{1}{4}$ of Section 16; within the E $\frac{1}{2}$ of NE $\frac{1}{4}$; and the E $\frac{1}{2}$ of SE $\frac{1}{4}$ of Section 17; within the NE $\frac{1}{4}$

4. A new condition be added to the permit to read as follows:
The June Lake Public Utilities District (District) shall maintain a permanent piped bypass around the Fern Creek source sized such that a minimum of 200 gallons per minute will always flow by the diversion regardless of water use by the District, and configured such that it cannot be restricted or plugged. (0050400)
(0350400)
5. The time to complete full beneficial use is extended to December 1, 2010. (0000009)
6. The continuing authority condition shall be amended to read:

Pursuant to California Water Code sections 100 and 275 and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the SWRCB in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the SWRCB may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirement for the authorized project. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the SWRCB also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution article X, section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.

(0000012)

7. The water quality objectives condition shall be added to the permit:

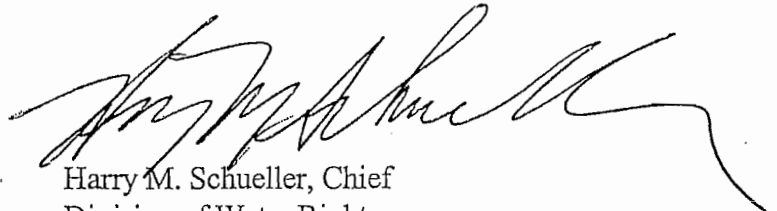

The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the SWRCB if, after notice to the permittee and an opportunity for hearing, the SWRCB finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the SWRCB finds that: (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

(0000013)

8. Permit 7352 is amended to include the following Endangered Species condition:

This permit does not authorize any act which results in the taking of a threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish and Game Code sections 2050 to 2097) or the federal Endangered Species Act (16 U.S.C.A. sections 1531 to 1544). If a "take" will result from any act authorized under this water right, the permittee shall obtain authorization for an incidental take prior to construction or operation of the project. Permittee shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this permit.

ORDER APPROVING A NEW DEVELOPMENT SCHEDULE AND
AMENDING THE PERMIT

WHEREAS:

1. A petition for extension of time within which to develop the project and apply the water to the proposed use has been filed with the State Water Resources Control Board.
2. The permittee has proceeded with diligence and good cause has been shown for extension of time.

NOW, THEREFORE, IT IS ORDERED THAT:

1. Paragraph 5 of the permit is amended to read as follows:

COMPLETE APPLICATION OF THE
WATER TO THE PROPOSED USE
SHALL BE MADE ON OR BEFORE

December 1, 1990

2. Paragraph 7 of this permit is deleted. A new Paragraph 7 is added as follows:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific

requirements are physically and financially feasible and are appropriate to the particular situation. The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.

4. A Petition for Change has been filed with the State Water Resources Control Board (SWRCB).
5. On December 22, 1995, the California Sportfishing Protection Alliance's protest was resolved based on a bypass condition for Fern Creek, which shall be included in this Order.
6. The petitioned changes would not constitute the initiation of a new right nor operate to the injury of any other lawful user of water.
7. The license condition regarding the SWRCB's continuing authority should be updated to conform to Title 23, CCR Section 780(a).

NOW, THEREFORE, IT IS ORDERED THAT:

1. The license condition regarding the source be amended to read:

(0000004)

4. A new condition be added to the license to read as follows:

The continuing authority of the SWRCB may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce returnflow; (4) suppressing evaporation losses

No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.

reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce returnflow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirements for the authorized project. 5. The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed 0.03 CUBIC FOOT PER SECOND TO BE DIVERTED FROM JANUARY 1 TO DECEMBER 31 OF EACH YEAR. THE MAXIMUM AMOUNT DIVERTED UNDER THIS PERMIT SHALL NOT EXCEED 21.7 ACRE-Feet PER YEAR.

6. The amount authorized for appropriation may be reduced in the license if investigation warrants.

~~XX7. Actual construction work shall begin on or before two years from date of permit and shall thereafter be prosecuted with reasonable diligence, and if not so commenced and prosecuted, this permit may be revoked.~~

7. Construction work shall be completed on or before DECEMBER 1, 1984.

8. Complete application of the water to the proposed use shall be made on or before DECEMBER 1, 1985.

9. Progress reports shall be submitted promptly by permittee when requested by the State Water Resources Control Board until license is issued.

10. Permittee shall allow representatives of the State Water Resources Control Board and other parties, as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this permit.

11. Pursuant to California Water Code Sections 100 and 275, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to minimizing waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement such programs as (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

12. The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the State Water Resources Control Board if, after notice to the permittee and an opportunity for hearing, the Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

13. THIS PERMIT SHALL NOT BE CONSTRUED AS CONFERRING UPON THE PERMITTEE RIGHT OF ACCESS TO THE POINT OF DIVERSION.

14. THE EQUIVALENT OF THE CONTINUOUS FLOW ALLOWANCE FOR ANY 7-DAY PERIOD MAY BE DIVERT IN A SHORTER TIME, PROVIDED THERE BE NO INTERFERENCE WITH OTHER VESTED RIGHTS AND INSTREAM BENEFICIAL USES; AND PROVIDED FURTHER THAT ALL TERMS OR CONDITIONS PROTECTING INSTREAM BENEFICIAL USES BE OBSERVED.

15. THE STATE WATER RESOURCES CONTROL BOARD, UNDER ITS AUTHORITY TO CONSERVE THE PUBLIC INTEREST, RETAINS CONTINUING AUTHORITY OVER THIS PERMIT TO REQUIRE PERMITTEE TO DEVELOP AND IMPLEMENT A WATER CONSERVATION PROGRAM, AFTER NOTICE AND OPPORTUNITY FOR HEARING. THE REQUIREMENTS OF THIS TERM MAY BE SATISFIED BY PERMITTEE'S COMPLIANCE WITH ANY COMPREHENSIVE WATER CONSERVATION PROGRAM, APPROVED BY THE STATE WATER RESOURCES CONTROL BOARD, WHICH MAY BE IMPOSED BY A PUBLIC AGENCY.

16. IN ACCORDANCE WITH THE REQUIREMENTS OF FISH AND GAME CODE SECTION 5946, THIS PERMIT IS CONDITIONED UPON FULL COMPLIANCE WITH SECTION 5937 OF THE FISH AND GAME CODE.

This permit is issued and permittee takes it subject to the following provisions of the Water Code.

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

An appropriative water right can be reduced or revoked through five continuous years of nonuse. However, the California Water Code specifies that under certain conditions no reduction or loss of the appropriative water right shall occur due to: (a) water conservation efforts; (b) use of recycled, desalinated, or polluted water; and/or (c) conjunctive use of groundwater and surface water. You must report the extent and amount of water claimed for credit below. Failure to report the amounts will deprive you of the benefits allowed under the Water Code sections.

NOTICE OF DETERMINATION

TO:	State of California	FROM:	June Lake Public Utility District P.O. Box 99 June Lake, CA 93529
	Governor's Office of Planning and Research		

SUBJECT: Filing of Notice of Determination in Compliance with Section 21152 of the Public Resources Code.

Project Title: Diversion of Water from Fern Creek per Appropriative Water Rights Application Number 28609		
State Clearinghouse Number (If submitted to SCH): 2005052032	Contact Person: Mindy Pohlman	Telephone Number: 760 648-7778
Project Location (Include County): The Fern Creek diversion is located within the NW1/4 of SE1/4 of Section 21, T2S, R26E, MDB&M in the County of Mono.		
<p>Project Description: The proposed project involves an appropriative water rights application currently pending before the State Water Resources Control Board (SWRCB), Division of Water Rights. The application proposes diversions for municipal and domestic purposes by the June Lake Public Utility District (JLPUD) from Fern Creek tributary to Reversed Creek thence Rush Creek thence Mono Lake in Mono County, California. The total rate of diversion is 0.3 cubic foot per second (134.64 GPM).</p> <p>The existing diversion facility consists of a sluice intake with a 4-foot diameter gated corrugated metal pipe (CMP) and a 5-foot diameter gated CMP overflow; a diversion building whereby water is diverted by gravity flow through a 6-inch ductile iron pipeline; a staff gauge located at the 4-foot outlet weir; and a Stevens Flow Meter. The project would involve no new construction of facilities; the diversion would be accomplished entirely through the existing facilities. NOTE: A condition placed upon this water source by two previous licenses (#10837 and #10838, see attached Division of Water Rights Orders) shall remain in effect for the subject application. This condition reads <u>The District shall install and maintain a permanent piped bypass around Fern Creek source sized such that a minimum of 200 gallons per minute will always flow by the diversion regardless of water use by the District, and configured such that it can't be restricted or plugged.</u> As a further point of information, this bypass has been constructed and maintained, as per the terms of the original condition.</p>		

This is to certify that the June Lake Public Utility District approved the above described project on June 22, 2005 and made the following determinations:

1.		The project will have a significant effect on the environment.
